Services Offered:

ITEM	DESCRIPTION	Remarks/ Comments
1. Programmable Automatic Time Tracking Device (ATTDEV) (Automatic school bell System)	<p>Tracks institutions routine 24/7 ringing all bells automatically with and without power. The device can ring school bells for up to 14 days in total power blackout. We have installed these systems in more than 400 schools country wide and have been in use now for more than 15 years since we did the first one in May 2009 at G.G Kinamba Sec School in Laikipia County. (Customer is advised to ask for a soft copy of the list of auto bell installations by this Company).</p> <p>Rental Option: We have a good number of schools who opted to rent the systems so that all technical matters regarding its operation and service, maintenance and repair is done by the company solely without preferring any cost to the school at all.</p>	<p><u>Rental Option:</u> System with one electric bell @Ksh4,000/= per School Term(4months) this about Ksh.1,000/= per month. Upfront cost before installation Ksh.5,000/= only as facilitation fee.</p> <p>Many schools prefer to rent the system, they argue that it's the bell ringing service they need and not the hardware.</p> <p><u>CASH OPTION:</u> Automatic Bell System with one electric bell and without Power Backup to cost Ksh..Negotiable and wiring @ 130/= per meter. System with Power backup to cost Ksh.Negotiable. Extra bells to cost Ksh..Negotiable, plus wiring @ Ksh. 130/= per meter.</p>

2.	Biometric clock In/Out for Teaching and Support Staff.	Scans fingerprints and indicates date and time a Staff member reports to duty and leaves after work.. The records can be printed out for hard copy purposes and/or maintained in the school data base for future references and returns purposes. The system can be GSM linked so that ansms is sent immediately to the CEO's (Principal's) Mobile number notifying him/her of the date and time a specific staff member clocked in or out.	<u>Cost without GSM:</u> Ksh...Negotiable. <u>Cost with GSM:</u> Ksh.Negotiable.
3.	Biometric clock In/Out for Students	Scans finger prints and sends sms to parents notifying them of the date and time the student has reported to school or left school. A copy of this information is stored in the schools database for future reference should need arise.	<i>(At least one set is recommended for each form in a triple stream school).</i> <i>Cost:Ksh....Negotiable</i>

4.	Office Intercom Wireless Option	<p>This the Modern Digital intercom that connects wirelessly to offices within a radius of 1000m and upto the seventh</p>  <p>Floor incase of storey buildings. The device is customer friendly easy to use, Plug and play.</p>	<p>Cost depends on the number of offices you want to connect but at a flat rate of Ksh. Negotiable,.</p> <p>Cost includes delivery,programing, installation and commissioning.</p>
5.	CCTV	Secure whole institution or the most sensitive areas with 24/7 Infrared cameras that see clearly in the dark with Power backups. A choice for wired and wireless connected cameras with/without Internet protocol is available.	Quotation to be done after site inspection.

6. SECURITY GUARD PATROL SYSTEM: This will ensure that your security Guards perform as specified in the contracts. Ensure that they keep patrolling the premises every so many minutes as specified. Check points at sensitive points in the premises are mounted at strategic positions where the officer will log in every time a patrol is made. This will be downloaded to the institutions data base. You can view how the security officers were patrolling every day showing number of times and the time when each point in your premises was patrolled. The records can be printed out when required for administration purposes.

This system makes sure the security Guards do not sleep on the job.

Because of the existence of the guard tour system, managers can monitor the work process of the security guards, enhance the security guards' sense of responsibility, and avoid laziness.

COST OF SYSTEM: Cost depends on the number of devices used, and the number of check points mounted. System with one sensor and 6-10 checkpoints cost Ksh.....Negotiable.

For every extra checkpoint mounted the institution pays as shall be agreed.

7. SECURITY GUARD WALK TALKIE SET: Walk Talkie have a communication range of up to 8km in a clear line of sight, without barriers. Your guards can communicate within any school premises no matter the amount of barriers because the distance is not anywhere near 8km.

Cost :

These are available at a price of Ksh....Negotiable contact us .

7. THE SCHOOL PA SYSTEM: To be customized as per the needs of the institution. Cost will also depend on such specifications as per customer's desire.

8. The SCHOOL WHITE BOARD:

Whiteboard with Aluminum Frame – 8ft X 4ft.

@ KSh.....customizable and negotiable

Surface resists scratches and stains
